ABOUT ME

I live a life filled with experiences, and believe that these experiences have built a tremendous framework of skills. My desire to learn each day has never waned, and has led me to managing a varied group of projects.

Working as a licensed contractor has given me tools for customer service, employee management and public works contracts. With a technical background, I have worked into supervising and managing people and projects, with a good degree of success.

I consider my greatest skill to be my troubleshooting. Taking challenges one step at a time, I can always find a solution, and often the root cause of an issue. This allows me to build, and grow, from every challenge.

WORK EXPERIENCE

General Manager – Crestline Village Water District (2020 > 2021)

My time as General Manager for the district afforded me the opportunity to handle a management role for a public agency, and to learn many of the details of regulatory compliance, human resources, budget organization and management, and a variety of useful employee and contractor/consultant management skills.

Electro-Mechanical Specialist – Crestline Sanitation District (2010 > 2020)

Working at Crestline Sanitation afforded me the chance to manage multiple employees, projects and schedules concurrently, while handling contractor oversight, safety equipment maintenance and training, SCADA integration and many other managerial tasks.

Technical and Mechanical Maintenance tasks, IT System Management, SCADA Design & Integration, Program Development and Training and Employee Management were all portions of my regular schedule in addition to my role as Union President. I lead my department, and managed all aspects of budgets for Electrical and Instrumentation needs, as well as performing on-call Supervisor duties.

EDUCATION

Grantham University, Missouri (2012 > 2016)

Bachelor's Electronics Engineering Technology, 2016 – GPA 3.38

Associate's Electronic & Computer Engineering Technology, 2014 – GPA 4.00

Rim of The World High School, California (2001)

High School Diploma, 2001 – GPA 3.89

Advanced knowledge and ability with Microsoft Word, Excel and PowerPoint.

Licenses and Certifications

California Electrical Contractor's License, CSLB 2012

California Water and Environmental Association Electrical & Instrumentation Grade IV, CWEA 2014
